

Boord Notes

New in v2.5: Tidy up and Ask

Two new helpers that use AI. For Andre and his son.

What is new

Tidy up cleans up a note you dictated: it adds punctuation and paragraphs and suggests a title and tags. **Ask** lets you type a question and get an answer taken from the notes that have been saved. Both are optional. Nothing changes unless you tap to accept it, and saving a note works exactly as before.

1. Tidy up a note

1	On Capture , dictate or type your note as usual.
2	Tap Tidy up under the Notes box. Wait a few seconds.
3	Read the suggested title, notes and tags.
4	Tap Use this to accept, or Keep mine to leave your note as it was. Tap a suggested tag to add it.
5	Tap Save Note as usual.

It keeps your language - Afrikaans stays Afrikaans - and it is told not to add or remove any facts. It prefers the tags you already use.

Always read it before you tap Use this. The AI can still get a word wrong, especially names, numbers and chemical or product names. Your original text is only replaced when you tap Use this.

2. Ask the notes

1	Open the Ask tab.
2	Type your question, in English or Afrikaans. For example: <i>When do we spray the Block 4 pears?</i> or <i>Wat is verkeerd met die ou trekker se PTO?</i>
3	Tap Ask and wait a few seconds.
4	Read the answer. Under it are the notes it used - tap one to open the full note and check it.

The answer comes **only from the saved notes**. If the notes do not cover your question, it says so instead of guessing. If two notes disagree, it tells you and shows the dates. Only notes that have synced to the server are searched, and archived notes are left out.

3. Tidy up a note you already saved

1	Open the Entries tab and tap the note.
2	Tap Edit , then Tidy up , and read the suggestion.
3	Tap Use this , then Save Note .

The note keeps its original date, location and weather. Only the title, notes and tags change.

Good to know

- **Both need signal.** They work through the farm server's internet. Out of range they just say so, and you can still capture and save notes as normal.
- **What is sent.** When you tap Tidy up or Ask, the text involved goes to Anthropic's Claude AI. For Ask that is your question plus the saved notes (with dates, blocks, tags, weather and photo captions). Photos and GPS positions are never sent. Nothing is sent unless you tap one of the buttons.
- **It can be wrong.** Treat answers as a starting point and check the notes it points to before acting on quantities, timings or chemicals.
- **Daily limit.** To keep costs small there is a limit on how many times per day the helpers can be used. If you hit it, try again tomorrow.
- **Buttons missing?** Fully close the app and reopen it. If Tidy up and Ask are still not there, tell Dawie.
